

MODEL No.	DESCRIPTION:
2581	12GA Super-Sock® Bean Bag
	Revision F 2/23

NOT TO SCALE

PHYSICAL & OPERATIONAL	
Type	Point Control Impact Munitions
Caliber	12 GA
Weapon Compatibility	Cylinder Bore, 18" Barrel Minimum
Cartridge Length	2.40" (61 mm)
Effective Range*	75' (25 M)
Projectile Weight	40 gm
Projectile Material	Shot Filled Ballistic Fiber
Overall Weight	51 gm
Velocity	280 ft./sec
Warranty	5 Years from Shipment Date
<p>All specifications are average and are subject to change without notice.            All performance specifications are based on testing conducted in Jamestown, PA USA,            At an elevation of 1,058 feet above sea level at ambient temperature conditions.</p>	

**WARNING:** CSI manufactures a variety of CTS less lethal products which are pyrotechnic, incendiary, emit projectiles, generate smoke, are under pressure, or are explosive in nature. When used in accordance with CTS training guidelines and the individual agency's policy, they are intended to cause varying degrees of pain and injury. These products are restricted to law enforcement, corrections, and military personnel and are used to gain compliance, disperse crowds, restore order, or temporarily incapacitate dangerous persons. In rare circumstances, if used incorrectly, CTS less-lethal products may cause damage to property, serious bodily injury or death. Therefore, it is of vital importance that any person using the force option depicted on this page receive proper training to ensure the safest and most effective use of this product.

SHIPPING INFORMATION	
Proper Shipping Name	Cartridges for Weapons Inert Projectile
UN Number	0012
Hazard Class	1.4 S
Labels Required	Explosive 1.4S
Quantity Per Package	5 Cartridges in Cardboard Box
Total Package Weight	50 lb. (400 Cartridges)
Package Type	Fiberboard Box
Package Dimensions	17 x11 x 6

\*The Model 2581 Super-Sock® is in its deployed state immediately upon exiting the barrel. It does not require a minimum range to "unfold" or "stabilize." The Super-Sock® while designed to produce sufficient deterrent energy at impact, is also relatively aerodynamic and is very accurate. Effectiveness depends on many other variables, such as distance, clothing, stature, and the point where the projectile impacts.

**CAUTION:** Shots to the head, neck, thorax, heart, or spine can result in death or serious injury.
